ABOUT ME

An experienced programmer with a strong background in C and Python. I am passionate about coding and enjoy creating innovative solutions for complex problems. My expertise lies in web development, Android development , leveraging my programming skills to create mobile and web applications that are intuitive and efficient.

EDUCATION BACKGROUND

- Sri Vivekananda
  SSC
  10 CGPA

- Narayana Junior College
  Intermediate
  973/1000

- JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY GURAJADA VIZIANAGARAM
  B.Tech III year in Computer Science And Engineering
  CGPA 8.5(till 5th sem)

CERTIFICATIONS

- Python Certification from HackerRank
- PHP For Beginners 2023 Certification from Udemy
- HTML-CSS For Beginners Certification from Udemy
- C language Certification from Sololearn
- C++ Language Certification from Sololearn
- Machine Learning course certification from Coursera

PROJECTS

- **Review Analysis Using Machine Learning**

  Using Webscraping,I scraped the data of Products from Amazon website and extracthe reviews and ratings of that Product.
  I built a ML model from that Data.
  Using Sentiment Analysis , I trained the model.If a new review comes ,then the model can predict whether it is a positive review or negative review

- **Grocery Store App**

  Grocery app is a virtual shopping cart that allows users to add items they need to buy, along with the quantity of each item and its cost.
  When the user selects the "Add Item" button, they can input the name of the item, the number of items they need to purchase, and the cost of each item.
  The app calculates the total cost of the items and displays it to the user. Once the user is satisfied with their selections, they can click the "Add to Cart" button to add the items to their virtual shopping cart.
  The user can also remove items from the cart or update the quantity of items as needed.

- **To-Do List App**

  A to-do list app is a tool that helps users keep track of their tasks and activities. Users can create a list of tasks they need to complete, set reminders for important deadlines, and mark tasks as complete once they are done. This app can be very helpful for people who want to stay organized and productive.

- **Personal Portfolio**

  I developed a personal portfolio website that showcases my   professional work, skills, experience, and accomplishments in a visual and engaging way. This website typically includes a homepage, an "about me" section, a portfolio section displaying samples of the individual's work, a list of skills, contact information, and often a blog or news section.

EXPERIENCE

- **AICTE Android VIRTUAL INTERNSHIP**

  Google supported virtual Android Internship In Kotlin
